

REMARKS

The Examiner's paragraph 8 objection to claim 11 is noted but is deemed to be of concern no longer due to the cancellation of such claim.

Paragraphs 9 through 12 of the Examiner's Office Action set forth various grounds of claim rejection based upon Yoho alone and combined with Horowitz. These rejections are traversed in light of the amendments herein. The present claims are patterned after the issued claims of applicant's prior patent 7,104,082 but add the supplemental cooling heat exchanger 306. Such component in system configuration as claimed is found nowhere in the prior art including that cited and/or applied by the Examiner and/or known to applicant.

Reconsideration and a Notice of Allowance are requested. In the event that the Examiner considers that a terminal disclaimer is now required in order to attain an allowance, such can be provided. Further, in the event that the Examiner is of the opinion that the present amendment does not place this application in condition for allowance, he is hereby requested to telephone applicant's attorney for an interview which would also include applicant.

Respectfully submitted,

  
Michael J. Colitz, Jr.
